

Swiss Chemical Society (SCS)

## Internship Portal

for Students of Chemistry, Chemical Engineering, Materials, Medicinal Chemistry and Chemical Biology

**SCS**Swiss Chemical
Society

## **The SCS Internship Program**

internships.scg.ch is a platform for employers from industry, governmental laboratories as well as non-profit organizations to present available internship positions. Students can apply for these positions or can post their own applications:

Internships provide an opportunity for students to

- acquire skills and know-how,
- explore a professional environment,
- and to establish a relationship with a potential employer.
   Often, young employees are recruited from the best interns.

This service is free of charge for student- and corporate members of the SCS. Students who are not members of the SCS are still welcome to browse through the offers and to apply for a position.
